

**"UZ-SEGANG" JV LLC
LOGISTICS AND EXPORT CENTER**

Who are we?

- **We are a unique enterprise of its kind. You could not see such a system of collecting and sorting fruits and vegetables and legumes anywhere else in Uzbekistan. At our enterprise, modern technologies of processing and sorting of all types of fruits, vegetables and legumes are collected. We guarantee our partners high quality and on time delivery. We are the ones you can work with on your conscience. You could find an assortment for every taste, appearance and quality.**

What do we have?

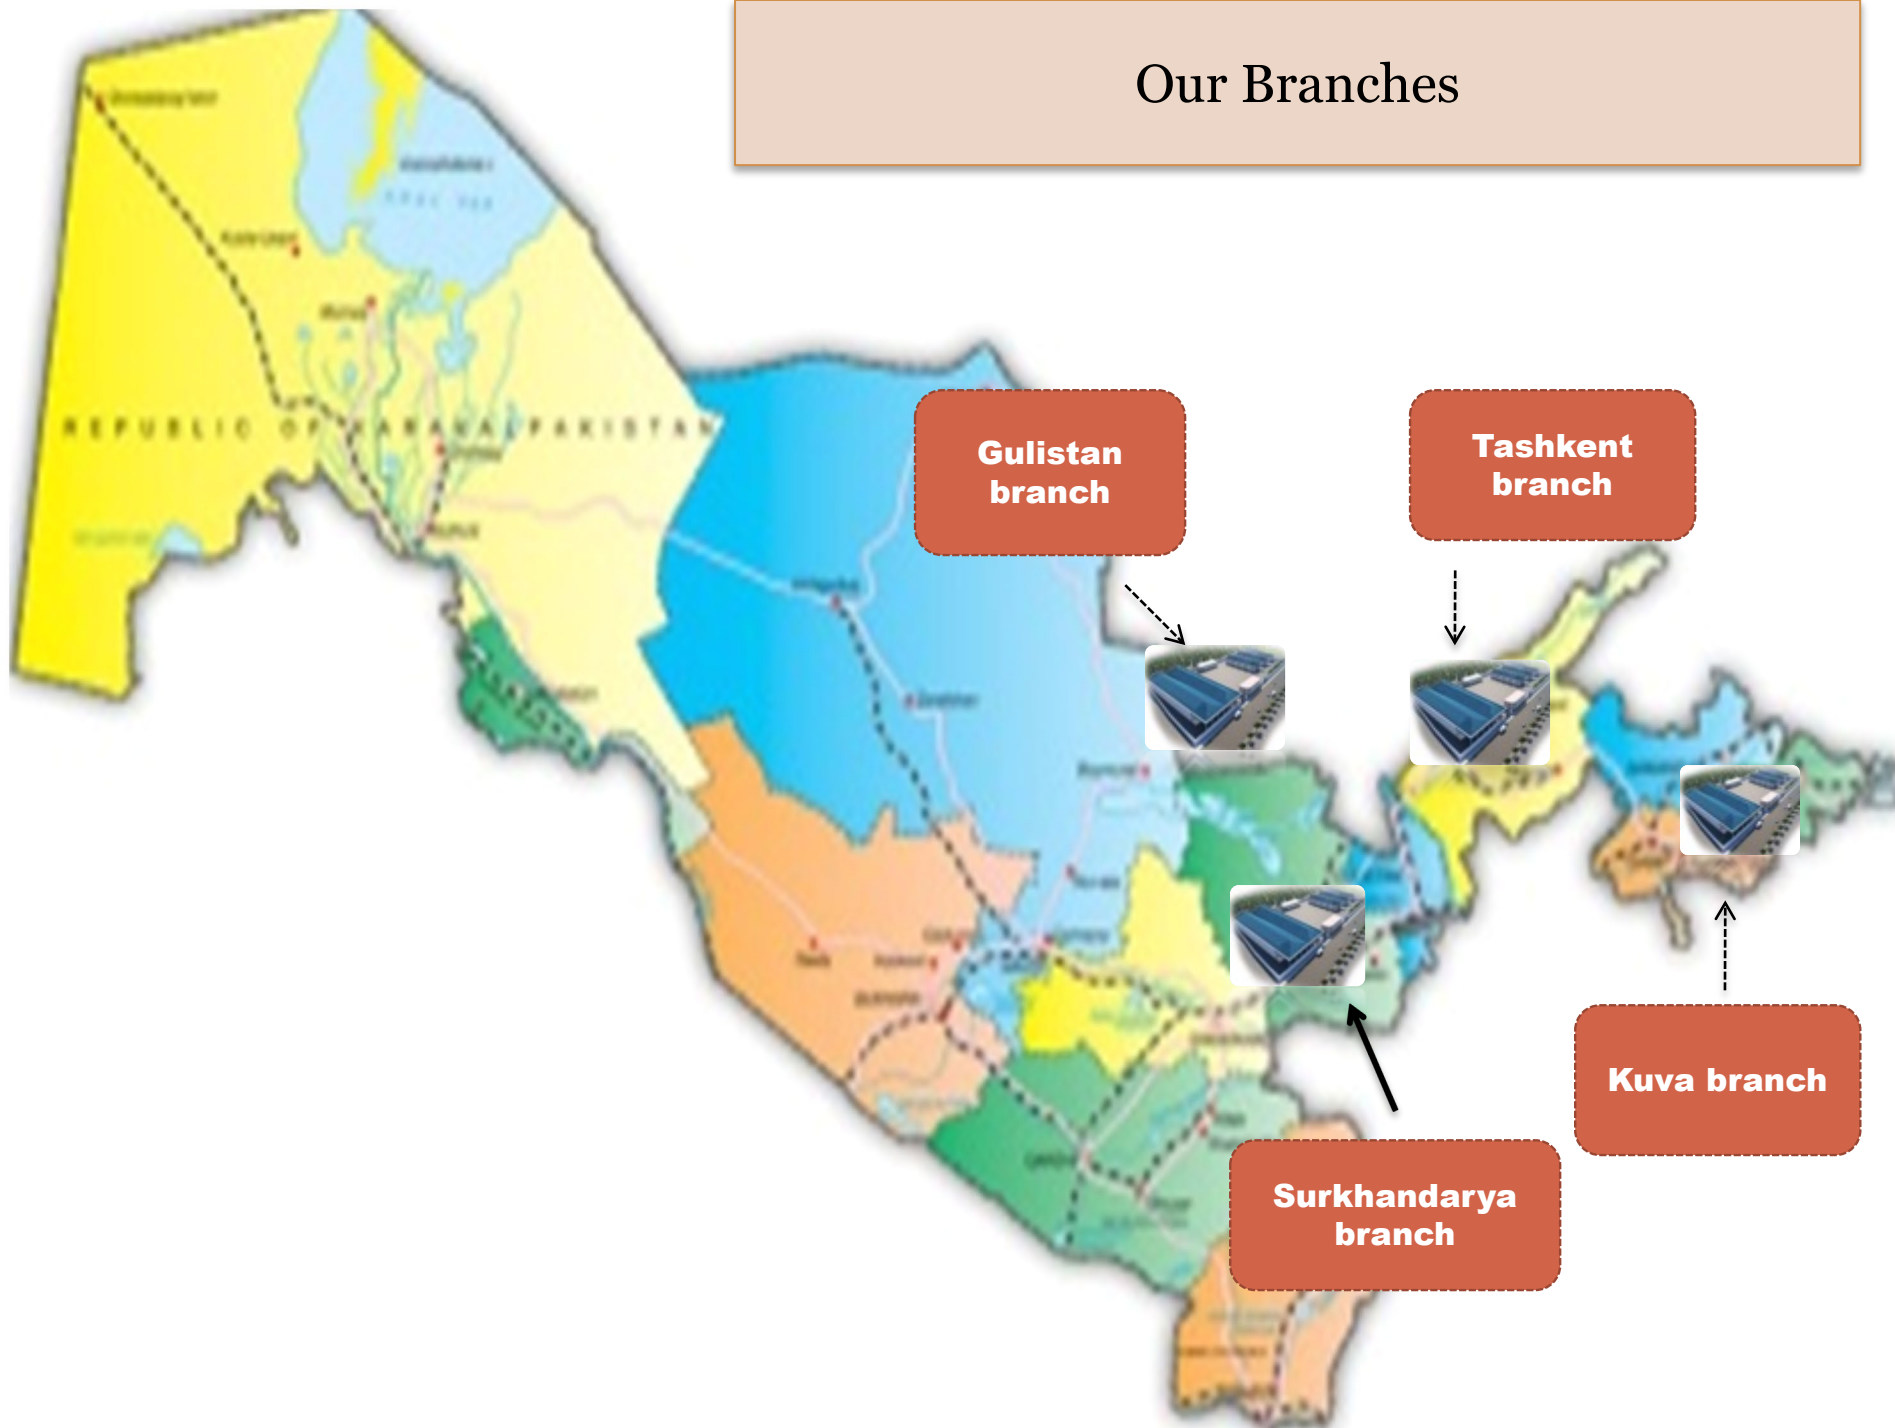

We have our own gardens throughout the Republic of Uzbekistan with an area of 200 hectares. And we created a cluster system of 120 responsible farmers with whom we signed a contract. The cluster area is more than 1000 hectares. The total amount of productive land is about 1,200 hectares. It includes more than 20 types of fruit and vegetable products and 3 types of beans. More than 5 types of packaging styles for each product. As well as we have our own modern refrigerator trucks (the number of 9 PCs) in order to transporting new harvested products to storages and other addresses fast and on time.

Our clusters

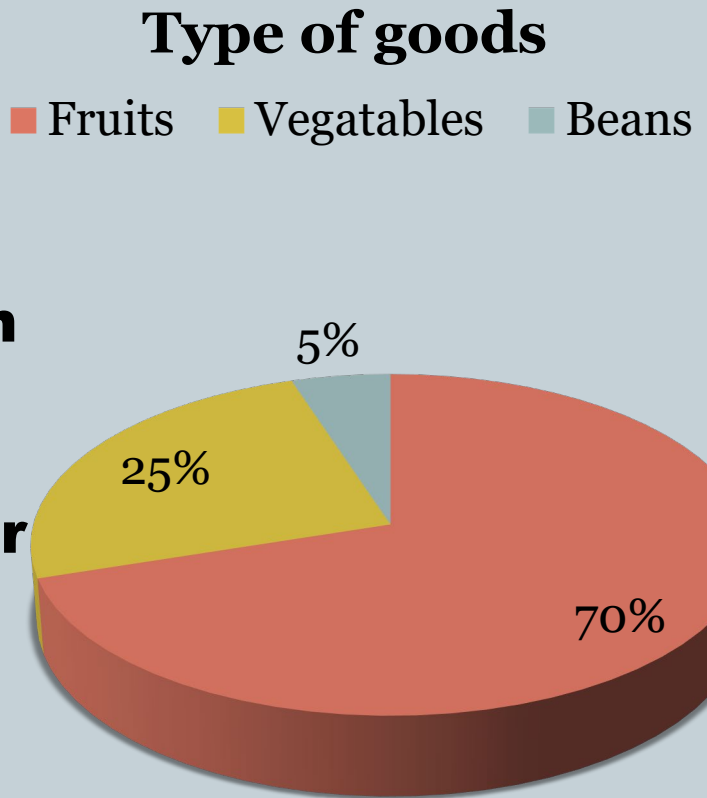

- **Clusters were created with Farmers over the Republic. Farmers were selected according to their land plot, assortment, and history of the previous crop. Each selected farmer has at least 3.5 hectares of fertile land All clusters are located in 4 regions of Uzbekistan.**
- **They are:**
 - 1. Fergana region, Kuva branch.**
 - 2. Tashkent region. Tashkent branch.**
 - 3. Syrdarya region. Gulistan branch.**
 - 4. Surkhandarya region.**
- **We have divided each area into divisions, each of which is responsible for its own production segment**

Our Branches

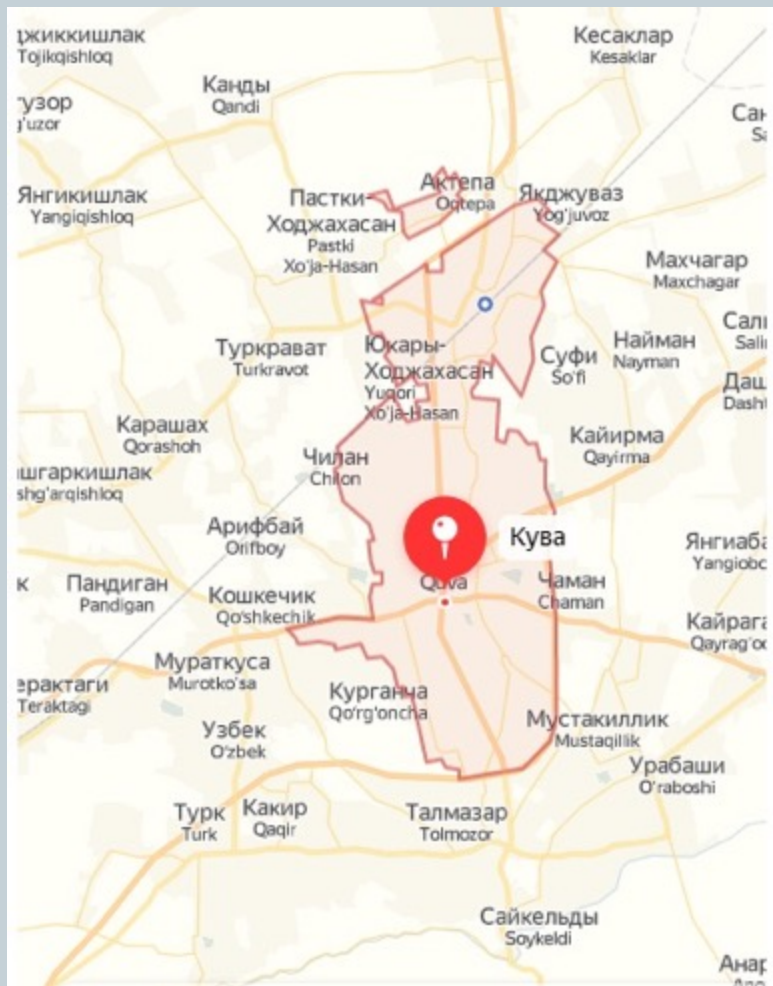

QUVA BRANCH

- **There are 450 hectares of land in the Kuva branch. Fruit will be grown on 70 %, or more precisely on 315 hectares of land. Vegetables will be grown on 25 %, or rather on 112.5 hectares. The remaining 5 %, or rather 22.5 hectares, will be used for growing legumes.**
